

# Make an Open Source Drone, List of Tools and Things

This document contains the various tools and object you will need in order to assemble your quadcopter drone.

## 1. Soldering Iron

A soldering iron with a pointy tip. Around 20W to 25W of power is ideal.

## 2. Solder

### 3. Wire insulation stripper

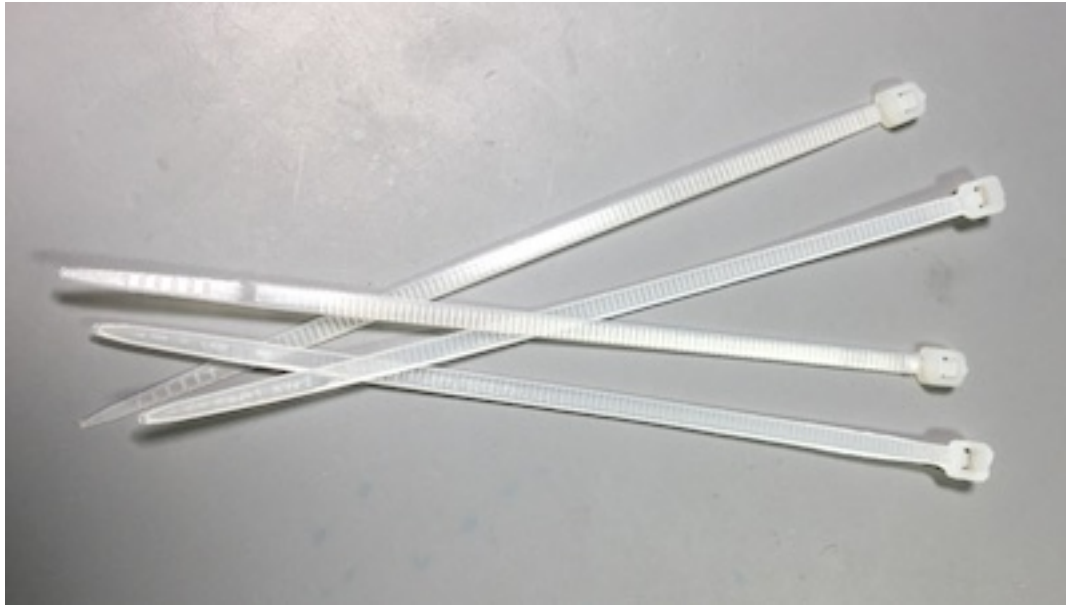

#### 4. USB cable

A cable suitable for connecting the flight controller to your computer. One end features a regular USB plug, and the other a Micro USB plug.

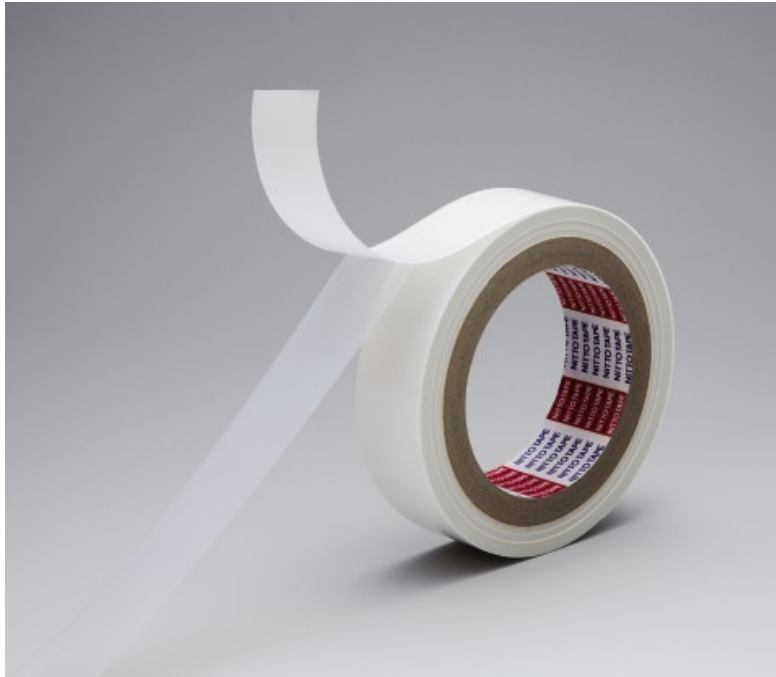

## 5. Cable ties

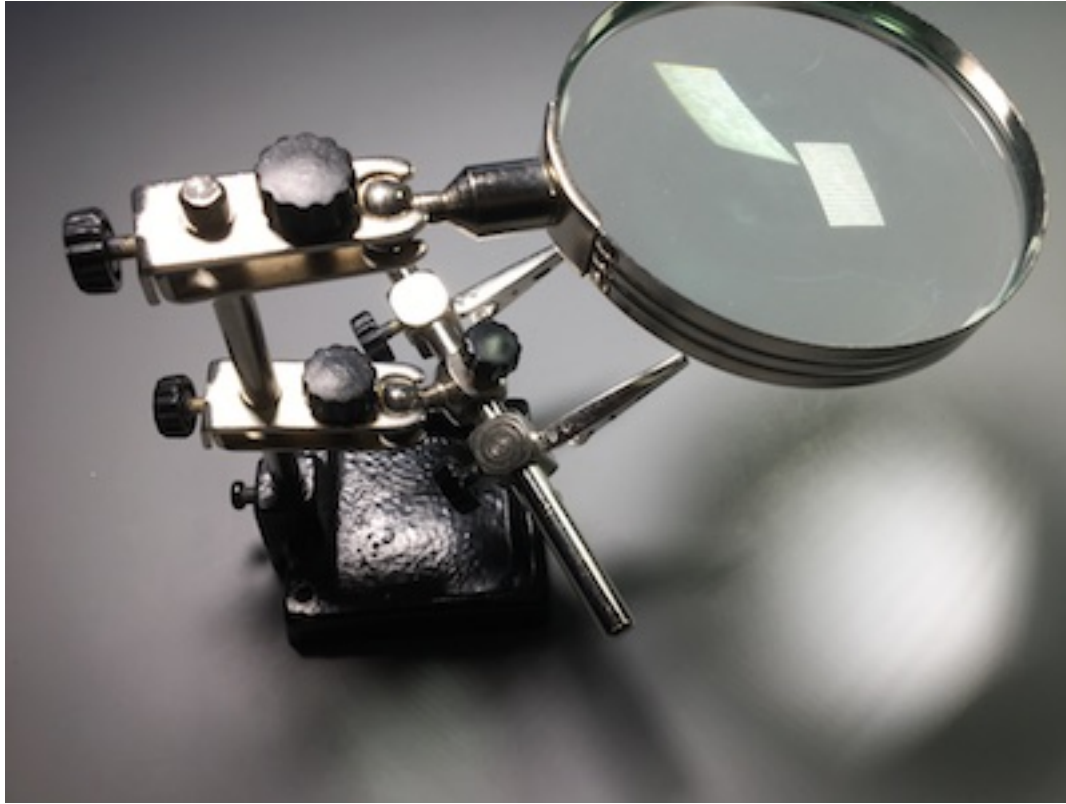

## 6. Heat shrink tube

## 7. Double-sided tape or velcro

## 8. Helping hands

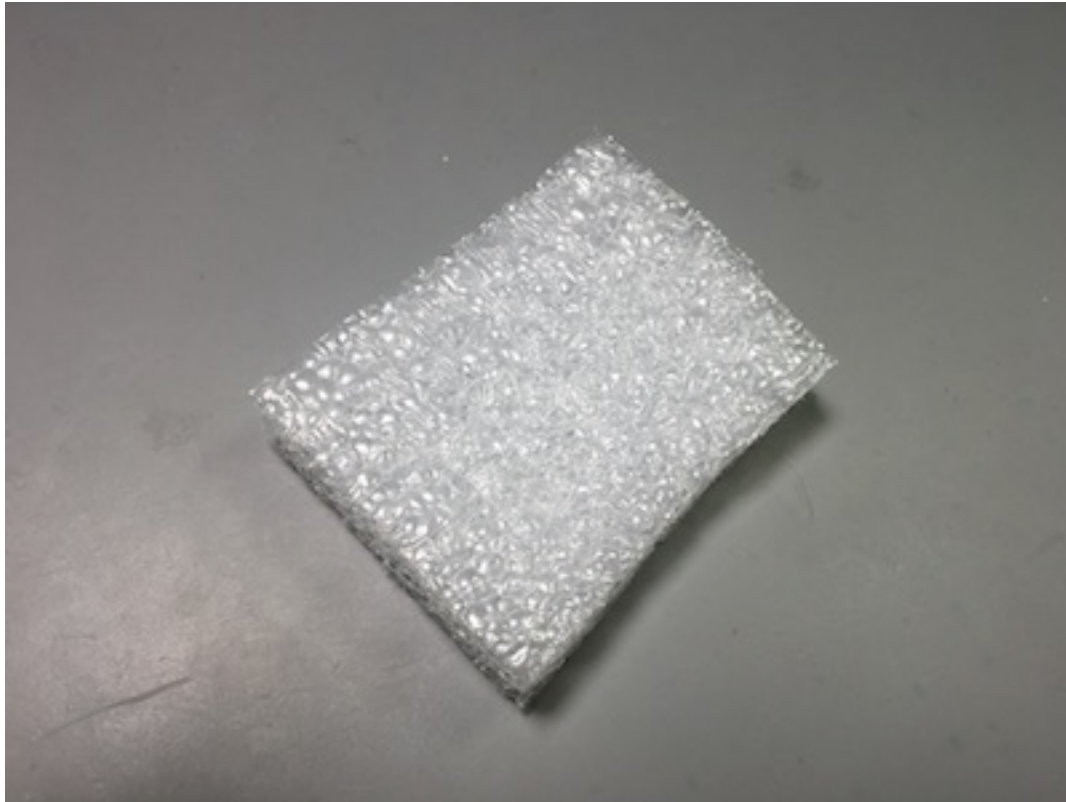

## 9. Wire cutter

## 10.Foam insulating material

## 11.Scissors

## 12.Hex key screwdriver

### 13. Appropriate battery connector

The exact type depends on the connector used in your battery. XT60 or banana plug connectors are typical.

14. 10 or 12 AWG wires for the battery

## 15. Teflon tape

## 16. Insulating electrical tape
